

COMPANY PROFILE 2025

GROUP 12 OVERVIEW

Group 12 is committed to serving our clients by consistently providing professional security, vulnerability assessments, system design, risk management, and security project management support services. Our experience in security, management, our knowledge of the market place, and our technology experience, combined with our assessment and risk control experience, affords our clients a significant value. Professional, Experienced, Independent, Collaborative . . . Trusted Advisor

RISK ANALYSIS

Risk in all its forms remains one of the most significant issues facing any business. Comprehending the full spectrum of risk requires the security practitioner to understand the client's business and how it relates to the reality on the ground and there after provide recommendations in risk mitigation

SUPPLY COORDINATION, CONSULTATION AND MANAGEMENT FOR:

- Project Risk Assessment
- Security Planning and Development of a project security program
- Design of Security Systems and facilities
- Writing of Contingency Plans
- Manage security-related incidents and emergency evacuation Recruitment, training and supervision of security guard forces
- Problem Solving and Response to Crisis.

We examine and manage a wide range of risk categories including internal/external loss prevention, employee theft, cargo theft prevention, emergency planning, cash handling, product handling, shipping and receiving, access control and personal safety. We work closely with on-site staff to determine the current security profile of the facility, identify potential risks and create user-friendly solutions to reduce the identified vulnerability. Lighting, fencing, physical security personnel, key control, parking, fire prevention, close circuit television (CCTV) systems, alarms, gates, and access control are some of the systems which can be assessed or implemented. A specific area or department can also be surveyed. The survey is performed during daylight and night time hours as well as business and non-business hours. This service will analyze the existing state of security and determine the degree of protection required. We provide you with a comprehensive, illustrated report upon completion of each security and risk analysis workplace investigation.

SUPPLY COORDINATION, CONSULTATION AND MANAGEMENT FOR:

Group 12 Management Consultants coordinate all physical security system installations and on-site physical security risk analysis surveys. We provide a systematic review of your facility's physical security features in which we will identify potential vulnerabilities. We evaluate threats and recommend effective countermeasures including threat assessments, adversary scenario development, adversary mission analysis and table-top exercises. By inventorying assets that need to be protected and documenting the spectrum of viable threats, we can help you develop a new security plan or update an existing strategy.
